MAN'S SEXUAL HEALTH

4LIFETRANSFORM™ MAN

Have you noticed that you have less energy and vigour as the years pass?

Would you like to age with a good quality of life?

What is the male menopause?

The male menopause is a hormonal decline that takes place in the body, usually between the ages of 40 and 50. The natural process is similar to that of the female menopause, except in men the change is less abrupt and therefore more difficult to identify.
Although the changes in a man's body as he ages may result in different symptoms, the most common are lack of energy, lack of stamina, loss of muscle mass and loss of bone mass. He may also experience irritability, mood swings, anxiety, difficulty in falling asleep, etc.

What does 4LifeTransform MAN do?

Contains specific ingredients for men's health, including vitamin D, Panax Ginseng and L-Citrulline. Panax ginseng root extract helps maintain **sexual health**, maintain blood **glucose** levels and **cognitive functioning**, boosts **vitality** and **alertness**. Vitamin D helps keep **bones** in good health, maintain normal **muscle** function and helps maintain normal function of the **immune system.**
